THIS INFORMATION IS INTENDED FOR PHYSICIANS AND OTHER LICENSED HEALTH CARE PROVIDERS TO USE AS A BASIS FOR DETERMINING WHETHER OR NOT TO RECOMMEND THESE PRODUCTS TO THEIR PATIENTS. THIS MEDICAL AND SCIENTIFIC INFORMATION IS NOT FOR USE BY CONSUMERS. THE DIETARY SUPPLEMENT PRODUCTS OFFERED BY DESIGNS FOR HEALTH ARE NOT INTENDED FOR USE BY CONSUMERS AS A MEANS TO CURE, TREAT, PREVENT, DIAGNOSE, OR MITIGATE ANY DISEASE OR OTHER MEDICAL CONDITION.

Baxaprin™ is a revolutionary approach to the complications of physical and stress-induced back pain, a condition that plagues everyone from professional athletes to weekend warriors. Baxaprin™ is designed to optimize core musculoskeletal physiology so as to limit stresses on the spine and associated tissues that may lead to back pain and injury. Unlike almost all other common back pain therapies today, Baxaprin™ does not just address the pain and/or inflammation associated with the condition, but instead it helps deal with the underlying foundational causes at the tissue level that often ultimately lead to injuries and the resultant pain and inflammation.

How does Baxaprin™ address the root causes of back pain?

One key is controlling the natural contraction and relaxation of the muscles that influence the spine. Another key is supporting optimal neurological actions of the motor neurons which control muscle function. Consider that if the body is deficient in the nutrients required to stop muscles from uncontrollably contracting and stressing the structure of the lower back and spine, that no other therapy could possibly end the cycle of pain and injury associated with most back pain conditions. And since it is nearly impossible to achieve the optimal levels of the minerals, electrolytes and other key nutrients required to support the needs of most physically active individuals through diet alone, the only solution is proper supplementation. Daily supplementation with Baxaprin™ can not only provide relief from back pain quickly, it can prevent it from recurring.

Baxaprin™ may:

- Help maintain spinal stability and proper muscle tone even under stressful situations
- Provide a natural pain reduction and muscle relaxing effect without causing drowsiness or loss of strength and performance
- Shorten muscle and soft-tissue recovery from sports injuries and trauma
- Reduce acute and chronic muscle spasm, including myofascial trigger points
- Increase pain tolerance in chronic pain syndromes

Supplement Facts

Serving Size 6 capsules

Servings Per Container 30

Amount Per Serving		% Daily Value
Vitamin D (as Cholecalciferol)	2000 IU	500%
Calcium (as DimaCal® Di-Calcium Malate)	200 mg	20%
Magnesium (as Di-Magnesium Malate)	500 mg	130%
Potassium (as Potassium Glycinate Complex)	90 mg	2%
Celery Seed Extract (<i>Apium graveolens</i>)(seed)	250 mg	*
Valerian (<i>Valeriana officinalis</i>)(root) [standardized to contain 0.8% valerenic acid]	200 mg	*
Passion Flower (<i>Passiflora incarnata</i>)(flower) [standardized to contain 3.5% flavonoids]	200 mg	*
Lemon Balm (<i>Melissa officinalis</i>) [standardized to contain 3% rosmarinic acid]	100 mg	*

*Daily Value not established.

Other Ingredients: Microcrystalline cellulose, vegetable stearate.

Uses for Baxaprin™:

- Acute Back Pain
- Acute Muscle Spasm & Pain
- Chronic Back Pain
- Chronic Muscle Spasm & Pain
- Loss of Flexibility
- Myofascial Pain Syndrome (Trigger Points)
- Neck Tension
- Sciatica Pain
- Sports Injuries
- Stress Headaches
- Stress Induced Muscle Tightness

What is in Baxaprin™?

Baxaprin™ contains quality standardized herbal extracts, such as valerian root (*Valeriana officinalis*), passion flower (*Passiflora incarnate*), and lemon balm (*Melissa officinalis*), all safe nervine botanicals known for their relaxant properties.

Also included, is our proprietary celery seed extract CelerEase™. It naturally contains compounds which include 1.5 – 3% volatile oils (including the terpenes limonene and b-selinene and pthalides) and flavonoids (apigenin and apiin). These compounds exhibit a wide array of properties including anti-inflammatory, antinociceptive (reducing sensitivity to painful stimuli), and diuretic.

Vitamin D has been added based on the demonstrated advantages of vitamin D therapy in helping to alleviate chronic muscle, bone and joint aches.

Baxaprin™ includes the fully chelated minerals and electrolytes di-magnesium malate and di-calcium malate. Also, potassium glycinate and potassium bicarbonate are added. All are involved in nerve transmission, muscular contraction and relaxation responses to provide further comprehensive support for back pain, muscle spasm and myofascial trigger points.

Recommended Use:

As a dietary supplement, take six capsules daily, three capsules twice per day with a meal, or as directed by your health care practitioner.
